landscape architect
took over.*

ANDORRA ADVOCATES *Landscape Design and fine Plantings*

On the cover: A lovely vista, tree-framed. Under Andorra's direction the former tangle was cleared away to reveal the distant view, and flowering trees and shrubs were planted in the foreground to delight the eye.

Your eyes do not deceive you! These before-and-after photographs tell the story of uninteresting grounds transformed by Andorra's landscape design and plantings into an enchanted garden. You, too, can have a beautiful view from every window, every doorway!

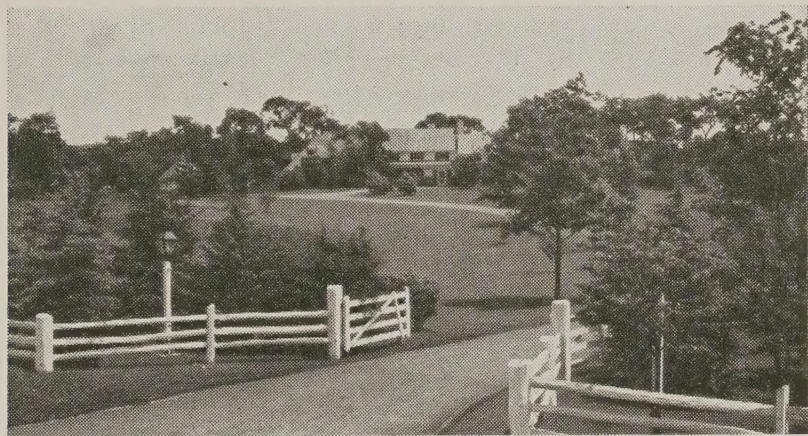

These two photographs were taken several months later, and show the results of study, design and supervised planting by Andorra. Mr. Arthur F. Paul, Andorra's president, is recognized as one of America's foremost landscape architects, just as Andorra is famous for the finest of trees, shrubs and evergreens, in special varieties.

Mr. Paul will be glad to consult with you on your landscape problems.

Let trees and shrubs in peaceful pattern bring serenity and charm to your home surroundings.

I'd like to improve my grounds, and am interested in:

*Approach and grounds
landscaped by Andorra*

- ☐ A landscape design
- ☐ New trees and shrubs
- ☐ Modernization of overgrown plantings
- ☐ A lovely vista from every window

*Before and after Andorra's
modern landscaping.*

Give *your* home a new look! If your plantings are sparse and uninteresting . . . or if overgrown, worn-out trees and shrubs detract . . . let Andorra give you a new and modern plan that will add charm and importance to your home. Make it a picture to be proud of, from every viewpoint! The enclosed card will command our prompt attention.
